**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 5,973,098. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences are the SCN in B component of claim 1 of the reference is included in the broad Y in B component of the instant claim 1; and the crown ether and/or kryptate in claim 6 of the reference is included in the electrodonor compound in claim 8 of the instant claims.

However, they do disclose the same or similar polymerizable composition, the claimed cast article and the claimed process for making a cast polyurethane resin article. Therefore, it would have been obvious to one of ordinary skill in the art to select the B component and the electrodonor component from the claims of the reference within the limitations of the instant claims since they have been shown to be effective in

a similar system and thus would have been expected to provide adequate results. There is no showing of unexpected results derived from said selections.
